

Omar Yanar Superintendent

School year 2021-2022

Safe Return to In-Person instruction Plan

Elementary and Secondary Schools Emergency Relief (ESSER) Grant

First of all foremost, thank you for your patience and understanding as we work through unprecedented times and the safe return for the return of in person instruction.

The Texas State Legislature did not approve House Bill 1468 which would have allowed an extension for distance learning, therefore our scholars will continue their education this school year in person.

What to expect for incoming scholars:

Health protocols

- Self-checks/monitoring strongly recommended
- Masks no longer required but may be worn if student desires
- Physical distancing is not required.
- Disinfections practices will continue.
- Water fountains will not be utilized, water filling stations for personal bottles are available • Contact tracing will continue for Covid-19 exposures
- Hand sanitizers and disinfection supplies will be available on all three campuses

Visitors:

As a visitor you will be expected to:

- Complete a health screening (temperature checks, questions about symptoms or possibility of exposure)

- Chose to wear a face covering while on campus
- Practice good hand washing as needed or use a sanitation station

On Campus-Learning :

We want to assure our parents families and scholars that safety is our priority as we prepare

to campus while continuing to support our scholars' academic progress. While on campus, parents, families, and scholars can expect:

- Health Screenings when coming on to campus
- Sanitation Stations (in the classroom and around campus)
- Deep Cleaning of Classrooms and Learning Spaces between classes and after hours.
- Face coverings can be worn by anyone and everyone present on campus
- Water fountains will be outfitted to only dispense water to fill water bottles
